Natixis successfully placed €285 million catastrophe bonds for the benefit of AXA Global Life

NATIXIS successfully managed, as co-arranger and joint bookrunner, the placement of €285 million extreme mortality catastrophe bonds issued by Benu Capital Limited, an Irish private limited company.

Based on an innovative indemnification mechanism, the transaction provides AXA Global Life with protection against the risk of extreme mortality events occurring in France, the United States and Japan for a five year period of coverage starting on January 1st, 2015. A total of €285 million of risk has been transferred to the capital markets through the issuance of two classes of notes: the class A, rated BB+(sf) by Standard & Poor's, for a €135 million amount, and the class B, rated BB (sf) by Standard & Poor's, for a €150 million amount.

This transaction is the largest extreme mortality catastrophe bond since the 2006 Osiris Capital Plc transaction placed for the benefit of AXA. The issuance spread over the yield of the collateral structure during the period of coverage is set at 2.55% for class A and 3.35% for class B.

This transaction is further strengthening the position of NATIXIS on the European catastrophe bond market.
